

YEAST QUESTIONNAIRE

Answering these questions and adding up the scores will help you decide if yeasts contribute to your health problems. Yet you will not obtain an automatic "yes" or "no" answer.

For each "yes" answer in Section A, circle the Point score for each question or sub-question. Total your score and record it in the space indicated at the end of the section. Then move on to Section B and C and score each section as instructed.

Add the total of your scores to get your **Grand Total Score.** _____

Total Score, Section B _____

Total Score, Section C _____

GRAND TOTAL SCORE _____

The Grand Total Score will help you and your physician decide if your health problems are yeast connected. Scores in women will run higher as 7 items in the questionnaire apply exclusively to women, while only 2 apply exclusively to men.

Yeast-connected health problems are **almost certainly present** in women with scores *over 180*, and in men with scores *over 140*.

Yeast-connected health problems are **probably present** in women with scores *over 120*, and in men with scores *over 90*.

Yeast-connected health problems are **possibly present** in women with scores *over 60*, and in men with scores *over 40*.

With scores of less than 60 in women and 40 in men, yeasts are less apt to cause health problems.
